MANA TO OPEN THREE NEW MEDICAL CLINICS AT PINNACLE HILLS PARKWAY

The Pinnacle Hills area continues to grow in residential and commercial size, and beginning next month there will be three new medical clinics available to Northwest Arkansas residents.

Medical Associates of Northwest Arkansas and Ear, Nose and Throat Center of the Ozarks plan to open a 14,200-square-foot building at 3730 S. Pinnacle Hills Parkway in Rogers this May. The new building will house three separate medical clinics: Northwest Arkansas Pediatrics, a MANA clinic; MANA Family Medicine clinic; and ENT Center of the Ozarks.

"We have seen an increase in demand for quality pediatric care and family medicine in Benton County," says Jason Wilson, chief operating officer of MANA. The group has operated a pediatric clinic in Lowell since 2010. The Lowell location will close when the larger Rogers facility opens. The pediatricians on staff at Northwest Arkansas Pediatrics will rotate between the Pinnacle Hills clinic and the Fayetteville clinics.

Dr. Martin Hannon and advanced practice nurse Jody Francisco will join MANA Family Medicine at Pinnacle Hills.

The Northwest Arkansas Pediatrics clinic in Pinnacle Hills will feature a pediatric walk-in clinic, as well as separated acute and wellness care. Having separate lobbies and care areas helps prevent the spread of viruses between sick and well children and infants. There will be a lab and X-ray services on-site. The pediatric walk-in clinic, which will be staffed by board-certified pediatricians, will be open from 8 a.m. to 5:30 p.m., Monday through Friday.

Northwest Arkansas Pediatrics was established in 1983 by Dr. Joe T. Robinson and Dr. Terry Payton, and is the largest independent pediatric practice in Arkansas with 19 board-certified pediatricians. With the new clinic in Rogers, the practice will offer three convenient locations in Northwest Arkansas.

The second clinic at Pinnacle Hills, MANA Family Medicine, will provide medical care to all ages. Dr. Martin Hannon and advanced practice nurse Jody Francisco, who have provided compassionate family medicine in Rogers for over 10 years, will be joining MANA and moving their practice to MANA Family Medicine at Pinnacle Hills. The new, convenient family medical clinic will offer same-day appointments, long-term disease management, sports physicals and wellness care.

The third clinic in the new building, ENT Center of the Ozarks, is a medical and surgical practice committed to providing comprehensive specialty care of the ear, nose, throat, head and neck throughout the entire Ozark region. The dedicated, world-class clinicians hold themselves to a standard of excellence and ensure quality care for their patients.

Established in 1999, MANA is an independent, physician-owned group that includes family medicine, pediatrics, an array of specialists and health services, as well as acute care walk-in clinics. MANA's mission is to improve quality of life by providing compassionate, comprehensive, quality healthcare. MANA has 100 providers and 21 locations serving Northwest Arkansas. ■
